

TFT ADMIN CONSOLE

For configuration of Draco tera switches

17" wide LCD display (up to 1920x1200)

USB-HID version

Keyboard with touchpad

Country-specific keyboard (optional)

PRODUCT INFORMATION

The Draco TFT Admin Console provides convenient access to the Draco tera enterprise KVM matrix and Draco tera flex matrix for supervisory management and control. For administration tasks

no matrix data port is required. System checks and troubleshooting can be performed locally without the need of connecting and cabling hardware. On top of supervisory management and

control, the console may optionally be connected through an extender allowing real-time access to all connected servers for system administrators.
