## PRODUCT INFORMATION

When it is necessary to operate several computers with multiple displays via a single keyboard and mouse, the Draco U-Switch is the ideal solution. A user-friendly interface makes it quick and easy to manage multiple CPU data from a single workstation. The Draco U-Switch is perfect for computer workstations normally found in banking, surveillance and command & control environments where multiple displays connected to different CPUs

must be managed simultaneously. By integrating the Draco U-Switch in the KVM environment users can perform fast and accurate mouse selections across multiple screens without the need to manually change keyboard and mouse connections. It now becomes a seamless and smooth operation to move a mouse across adjacent screen boundaries. Alternatively, changing the mouse and keyboard to another screen can be achieved using simple

hotkey commands. The Draco U-switch can be combined with the Draco tera enterprise and compact matrix switches to enhance the flexibility of multiple CPU management from a single multi-screen workstation. The Draco U-Switch saves valuable workspace, increases productivity, and gives the user real-time switching with seamless mouse movement across multiple displays.
